

INVESTMENT POLICY

July 2020

At fxTsignals.com, we recognize that responsible investment ("RI") is fundamental to our fiduciary duty to deliver sustainable returns for our clients and beneficiaries. We understand the importance of sound stewardship in managing investors' capital, and our approach to RI closely aligns us with the values of our clients and shareholders. In our duty to act in the best long-term interests of our investors and shareholders, we formalize our commitment to integrate and apply responsible investment approaches that better inform our asset managers across all business groups of environmental, social, and governance ("ESG") factors that may affect the preservation and returns of our client's assets.

Responsible Investment oversight

fxTsignals.com's Responsible Investment ("RI") Committee oversees and reviews the implementation of all RI policies and processes, as well as the firm's stewardship capabilities, across fxTsignal's investment engines.

fxTsignals.com's RI Committee provides the Firm's employees with a policy resource with which to formulate and disseminate information regarding our approach to responsible investment. The Committee is composed of senior representatives from all of Man Group's underlying businesses, ensuring a broad perspective of RI across asset classes and investment strategies. This not only underlines the strategic importance of sustainability for our corporate philosophy; it also ensures that it is organized and managed from the highest level. fxTsignals.com actively works to cultivate a diversity of approaches to identify, assess and integrate risk and climate risks. Indeed, the breadth of fxTsignals.com's investment engines means that the firm represents a unique intersection of perspectives — quantitative, discretionary, macro, private markets and asset allocator—where competing and sometimes conflicting expectations, approaches and applications of ESG are actively debated.

Reporting into the fxTsignals.com RI Committee, Man's Stewardship and Active Ownership Committee ("SOAC") oversees all proxy voting and engagement activities at the firm level. We will go to develop an enhanced ESG voting policy that applies specific overlays that represent the core principle of good governance.

fxTsignals.com' Responsible Investment Policy

The purpose of this policy is to outline fxTsignals.com's recognition, commitment and support for the development and integration of responsible investment modalities across the firm's subgroups. The diversified nature of Man Group's multi-strategy businesses means that no single Environmental, Social and Governance ("ESG") framework is universally applied. Accordingly, fxTsignals.com expects its investment engines to apply the norms and best practices of responsible investment that are most appropriate for their strategy and asset class. For Man Group as a whole, these norms and best practices include:

1. Stewardship: enhancing the value and interests of our clients' assets through voting and active engagement;
2. ESG factors: considering and/or applying ESG criteria in the investment decision making process;
3. Education & activities: participating and educating responsible investment within the investment community.

This policy applies to the major asset classes where responsible investment can be practically addressed. fxTsignals.com's starting point in its approach to RI is publicly quoted equities and fixed income investments. We recognize, however, that the formation of best practices in RI is still nascent among many asset classes that are core to our firm's businesses. As such, we will continue to look for appropriate ways to apply responsible investment in areas such as stocks, commodities, bank, broker, insurance.
